

→ The entry level model

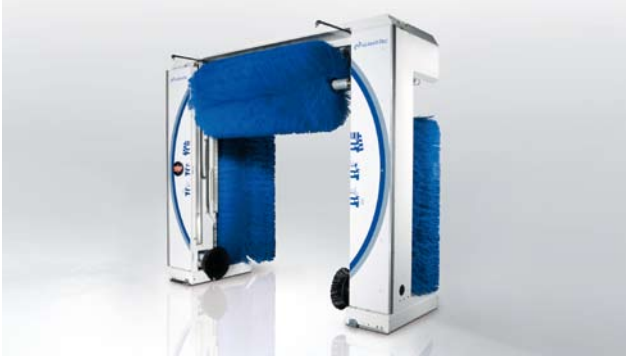

EasyWash

 *WashTec*

Excellence right down to the last detail

Ideal for professional car washing

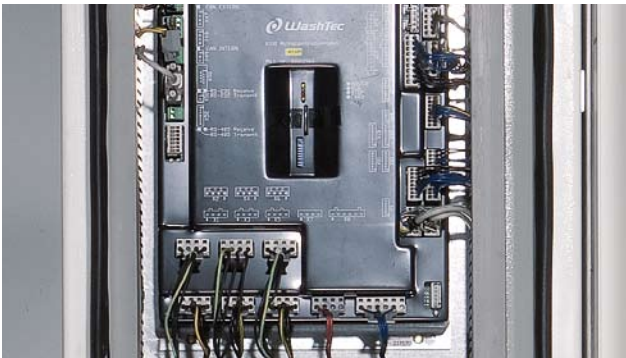

→ The basic configuration of the EasyWash provides all of the functionality that is required to clean vehicles: pre-wash, washing with gentle washing materials, and drying.

Technology from the market leader: Quality at a reasonable price

→ The high quality materials and workmanship ensure that the system will operate continuously and reliably with low maintenance costs.

Precise control – contour-tracking washing

→ The ideal distance between the washing brushes and the vehicle is continuously monitored by microprocessors. This results in cars that are clean all over.

Optimum metering of the cleaning and maintenance materials

→ Car washing is more than just simple mechanics. The WashTec technology integrates chemicals in the cleaning process in such a way that top washing results are achieved at extremely low cost.

Gentle washing material

→ The gentle washing material made from foamed polyethylene washes thoroughly without leaving marks.

Equipment options increase the performance capability of the EasyWash

→ Extend the performance range of your system with options such as the underbody wash.

Technical advantages to benefit your business

**Gentle pre-wash for
the best washing result**

↑ A foam prewash allows for gentle dissolving, making dirt particles easy to rinse off.

**High-pressure pre-wash
removes stubborn dirt**

↑ High-pressure rinsing is advisable after coarse dirt particles have been dissolved. The EasyWash comes with optional 16 bar high-pressure side spraying system.

**Wheel cleaning –
a “must” in any
car wash system.**

↑ Wheel washing brushes give the wheels a thorough cleaning.

EasyWash - The entry level model for your car washing requirements

EasyWash

The basic configuration of the EasyWash provides the full scope of professional car washing features:

- Effective washing with optimum cost-benefit ratio
- Little maintenance required
- Compact, uncomplicated system
- Low consumption

Adapted side washers – complete wash, clean all over

↑ The side washers are angled during the forwards movement and straight when the car wash reverses. This ensures that the washing result will be outstanding for any shape of vehicle.

Washing programme – vehicle maintenance and money-earner

↑ Maintenance programmes are extremely popular with customers and are therefore a key to more revenue and profit. A waxing applicator is optionally available for the EasyWash.

Optimum air flow – perfect drying

↑ The design of the dryer effectively forces the water droplets downwards away from the roof and sides of the vehicle. This helps to dry the sides of the vehicle and also provides all-round drying.

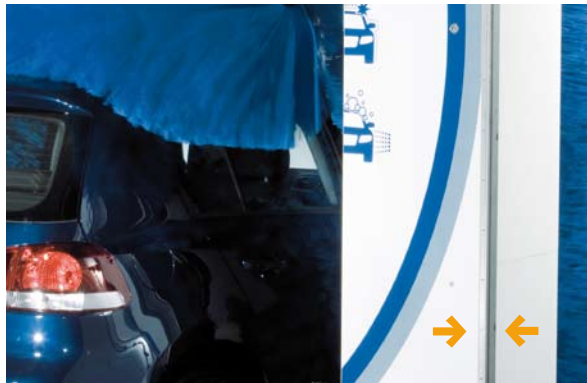

Options for increasing performance

Traffic light at entrance for rapid vehicle positioning

→ The traffic light at the entrance helps car drivers to position the vehicle quickly and precisely. It indicates the end of the wash and therefore speeds up the entire washing process for waiting customers.

Safety shut-off to avoid accidents

→ The safety shut-off, which consists of a strip that is attached to the doors of the EasyWash, stops the car wash immediately if it is touched. This helps prevent accidents in the wash bay.

Waxing programme for intensive vehicle care.

→ Car care and paint preservation help to protect the vehicle and therefore maintain its value. Preservation is a popular option in commercial car washes, and a key to increasing turnover and profit. The EasyWash can be optionally equipped with a waxing arch.

Underbody wash – increase business by having a wider range of options

→ The underbody wash is a popular service in winter and spring. The segment control allows short vehicles to be washed accurately and therefore helps to make the system operate economically.

Perfect dimensions – maximum business

Machine height: 3110 mm

Washing height: 2300 mm

→ Compact size for high performance with low space requirement. Also fits into very short bays.

Operating terminals – a multitude of variants offering convenience and additional benefits

↑ **Operating terminal:**
Terminal for wall-mounting. Most cost-effective solution for a convenient input device

- ↑ **MultiBox** – three functions in one module:
 - Issuing wash tickets
 - Recording and checking transponder cards
 - Remote control of the car wash

↑ **Code:**
Attractive terminal for wall-mounting or floor attachment. Code entry via keypad, operating mode with or without cable connection, registration of all washing programmes

↑ **MultiBox:**
Code issuing device for the cash office

↑ **Card:**
Versatile wash card reader with transponder technology for contactless, wear-free reading, individual, multiple and prepaid card function, happy hour function

↑ **MultiBox:** Simple programming of the transponder card

↑ **Card + Code:**
Combined solution for all situations – individual wash via code with registration, multiple and prepaid cards with robust transponder cards which are not restricted to a promotional period

↑ **MultiBox:** A module for code issuing and programming of the transponder card

↑ **Code + Scan:**
The modern solution for extremely easy system operation with voucher and scanner, wear-free reading, individual, multiple and prepaid voucher function, happy hour function

↑ **MultiBox:** Simple issuing of the wash voucher via printer
