NEW
SoftWash

 **WashTec**

*Compact, variable, cost-effective –
for commercial washing
in a small space.*

NEW
SoftWash

The NEW SoftWash offers all the benefits of cost-effective washing in a compact size.

- Cost-effective use from 300 washes/month
- Even the model "Basic" of the NEW SoftWash contains all the necessary functions for a successful washing operation
- Compact, uncomplicated system, also suitable for small halls
- Innovative frame concept for greater variability
- Wide range of options

Compact – the ideal dimensions for use anywhere.

↑ Compact size for high performance with low space requirement. Also fits into very short bays.

↑ Optimum dimensions for washing all standard vehicle types.

↑ A full range of washing height options in 10 cm stages allows the full hall height to be used, thus maximising business potential.

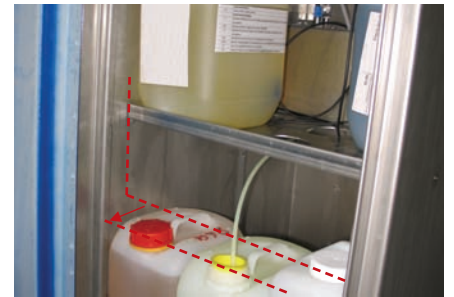

Excellent value – top quality for durability and low-maintenance operation.

↑ High-quality stainless steel frame. Precision manufacturing allows the system to be compact.

↑ The stable flat belt drives are low-maintenance and extremely robust.

↑ Easy to access and clean: the chemicals canisters are at the front, allowing easy refilling.

Variable equipment for top washing and drying results.

↑ A wide range of high-pressure options allows plenty of programme variations and guarantees outstanding cleaning results.

↑ Optional wheel wash brushes with integrated wheel and side high-pressure unit clean tyre rims particularly thoroughly.

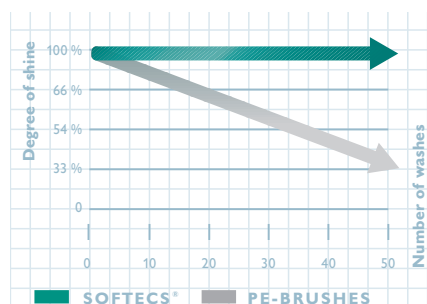

↑ Drying with an integral dryer or roof and side drying, as preferred.

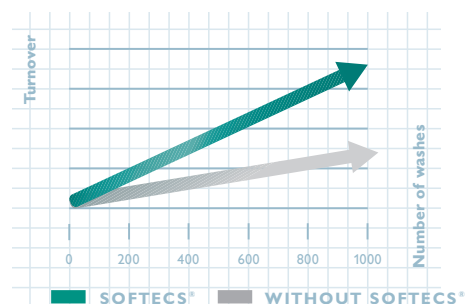

SofTecs® – get more from a technological and innovational edge.

↑ With SofTecs® you can win new customers, e.g. hand washers.

↑ SofTecs® washes gently without wearing. This retains shine and pleases even the most demanding of customers.

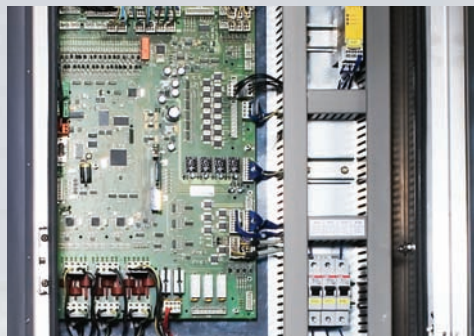

↑ More turnover through SofTecs®, since you can charge higher average prices because of the higher-quality wash.

Technical advantages from which your business will profit.

Ideal speed – more customer confidence.

↑ **Frequency control** at the travel and lift drives for a careful, smooth running and variable speeds. There is less stress on components, the machine runs smoothly and customers feel that the gantry car wash is safer.

Precise control – contour-tracking washing and drying.

↑ The **modern microprocessor** controls the carwash precisely and reliably. Intelligent function: during the first wash, **the control module stores the vehicle contour for the drying process**, so there's no need for additional light barriers.

Intelligent design – cost-effective washing.

↑ **Reliable block and tackle technology** is updated for the system, thus saving components and costs. The dryer and roof washer make optimum use of this technology with one drive system.

NEW
SoftWash

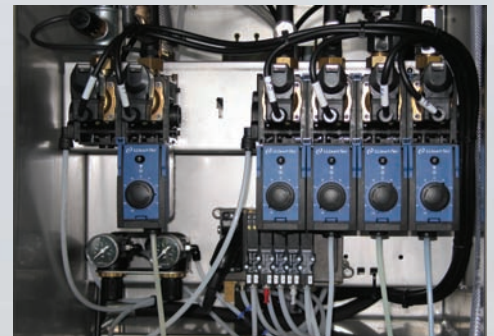

Adjustable side washers – complete wash, clean all over.

↑ **Brushes adjust automatically to the contours of the vehicle.** This ensures an **outstanding wash result** whatever the shape of the vehicle.

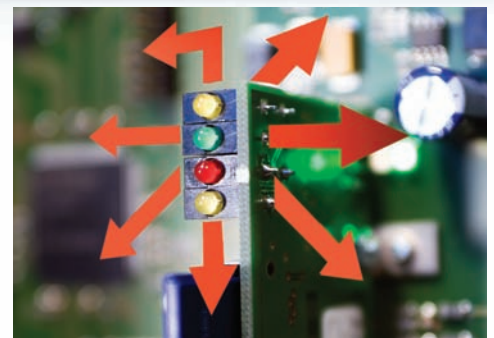

Compact agent distributor – intelligent development, maximum convenience.

↑ The **totally newly developed agent distributor** is small, compact and fixed so that it is ergonomic and user-friendly. The appliance is easy to handle, and so **incorrect operation is practically impossible.**

Permanent self-monitoring – reliable control.

↑ The machine **constantly monitors the main components.** Thanks to its self-diagnosis system, **faults can be prevented and down times minimised.**

Your options for increasing business.

Gentle prewash – for the best washing result.

OUR TIP: Integrate the prewash in all your washing programs and increase your average wash price.

- Prewashing is needed, particularly when extremely dirty vehicles are being cleaned or SofTecs® is being used.
- Gentle loosening of dirt using foam makes rinsing easier.
- Rinsing with high pressure is advisable after loosening coarse dirt particles using lather. Choose between the extended solution of the all-round roof wash, or the cheaper side high-pressure.

Waxing programs – look after the vehicles and the revenue will take care of itself.

- Vehicle care and preservation programs are extremely popular with customers and are therefore a key to more revenue and profit.
- Two different systems are available: cold wax and foam wax.
- Osmosis rinsing helps to provide speck-free drying.

Wheel cleaning – your customers will appreciate it.

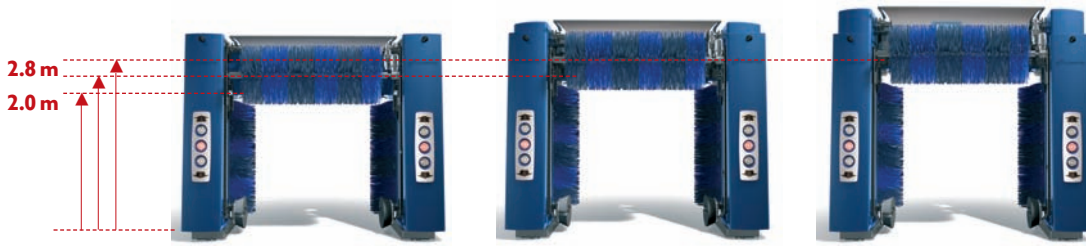

- Wheel washing brushes with a large diameter give even large wheels a thorough cleaning.
- Wheel spraying systems with special cleaner loosen stubborn dirt during prewashing.
- Powerful options for wheel washing:
 - High-pressure wheel washer, ideal for thorough cleaning of filigree rims (diameter of wheel washing brushes 1.94 m)
 - Low-pressure wheel washer for clean rims (diameter of wheel washing brushes 2.00 m)

Underbody wash – increase business by adding options.

- Popular service during winter and in the spring.
- A model that is sunk into the floor and a floor-mounted version are available. The latter is also easy to retrofit in existing bays. Both systems are available with segment control or swivelling tubes.
- Segment control allows short vehicles to be washed accurately and is therefore economical.

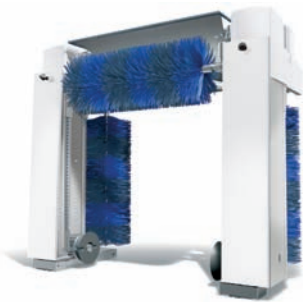

Perfect dimensions – maximum business.

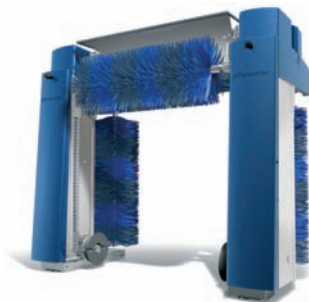

- Washing heights from 2.0 m to 2.8 m can be selected, in 10 cm stages.
- This means that the existing hall height can be exploited to the full, thus improving business potential.

Three design variants – individual layout.

BASIC

CLASSIC

STAR

- **Basic:** Simple, flat metal doors; white/grey in basic fitting.
- **Classic:** Convex door linings give a more dynamic appearance.
- **Star:** The convex front doors are given an additional lift with lights and the use of two colours.
- A wide range of colours is available and all variants have a high-quality powder-paint finish.

Operating terminals – many variants with convenient use and added benefits.

- **Code light:** Terminal for wall mounting. Cheapest solution for an easy-to-use input device.
- **MultiBox** – Three functions in one module:
 - Dispensing of wash tickets
 - Creation and checking of transponder cards
 - Remote control of the car wash

- **Code:** Attractive terminal for wall or floor mounting. Code entry via keyboard, operating mode with or without cable connection, registration of all washing programs.
- **MultiBox:** Code output device for the cash room.

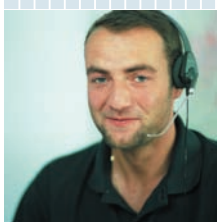

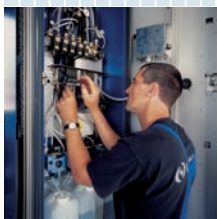

- **Card:** Versatile washing card reader with transponder technology for contact-free, wear-free reading, single wash / multiple wash / value card function, Happy Hour function.
- **MultiBox:** Simple programming of transponder cards.

- **Card + Code:** Combined solution for all cases – single wash via code with registration, multiple wash cards and value cards with robust transponder cards with no time limit.
- **MultiBox:** One module for code output and programming of transponder cards.

The “World of WashTec” has everything for your success.

- **Comprehensive range:** The right solution for your washing business can always be found.
 - **Roll-over car washes** for low, medium and high washing volumes
 - **Conveyor tunnel systems** with modular design for all sizes and all requirements
 - **Commercial vehicle washes** for washing companies and in-house requirements
