SoftCare[®] Pro

 **WashTec**

*The all-rounder for the
busy car wash.*

SoftCare[®] Pro

SoftCare[®] Pro has everything you need to earn real money from car washing:

- Economical system for 600 washes/month
- Top class manufacture and finishing
- Broad range of options
- Four design variants to choose from
- Modern, maintenance-friendly technology, well thought-out down to the last detail
- Top washing and drying result

SofTecs® – get more from a technological and innovational edge.

↑ With SofTecs® you can win new customers, e.g. hand washers.

↑ SofTecs® washes gently without wearing. This retains shine and pleases even the most demanding of customers.

↑ More turnover through SofTecs® since you can charge higher average prices because of the higher-quality wash.

Top washing and drying result for a satisfied regular clientele.

↑ Microprocessors keep the washing elements at the ideal distance from the vehicle at all times.

↑ The contours of the vehicle are scanned and stored during washing. The side washers are adjusted optimally to the vehicle contour.

↑ Optimum drying result through a drying system that follows the vehicle contours on the basis of the stored data.

Maintenance-free technology for lots of business at low cost.

↑ Stable and durable: maintenance-free flat belts save lubrication work.

↑ The side-brush carriage is driven by a frictional wheel and is maintenance-free.

↑ No downtimes for lubrication of bearings, chains or cables.

Top quality for reliability and long life.

↑ High-quality frame: completely galvanised steel construction for a long machine life.

↑ Wheel washer in stainless steel: non-corroding and robust.

↑ Motor housing of aluminium: unsusceptible to water, chemicals and other influences.

Technical advantages from which your business can only profit.

Constant contact pressure – extremely safe.

↑ Precise measurement and **control regulates the correct, safe distance to the vehicle.** The washers work with **constant contact** at all times. Optimum, contour-tracing drying is performed on the basis of the contour data stored during washing.

Ideal speed – more customer confidence.

↑ The travel and lift drives are **frequency controlled for a soft and smooth start** and **variable speed control.** There is less stress on the components, the machine runs smoothly and customers experience the gantry car wash as safer.

No dripping after washing – more satisfaction.

↑ **Wipers and drip channels prevent water from dripping** on to the dry vehicle from the frame, resulting in an **optimum drying result.**

Adjustable side washers – complete wash, clean all over.

↑ During washing, the **side washers** are **inclined** automatically at an angle matching the shape of the vehicle. This **ensures an excellent washing result on all shapes of vehicle.**

Permanent self monitoring – reliable control.

↑ The machine **monitors the main components permanently**. Thanks to selfdiagnostics, faults can be avoided before they happen, **thereby minimising downtimes.**

Contour-tracking spraying – high efficiency.

↑ The **contour-tracking spray arm system** works close to the car, thereby guaranteeing **economical usage of water and chemicals.**

Your options for increasing business.

Gentle prewash – best washing result.

OUR TIP: Integrate the prewash in all your washing programs and increase your average wash price.

- Prewashing is needed, particularly when extremely dirty vehicles are being cleaned or SofTecs® is being used.
- Gentle loosening of dirt using foamed, liquid or hot lather makes rinsing easier. Important in summer: Prewash with special insect remover.
- Rinsing with high pressure is advisable after loosening coarse dirt particles using lather. Choose between the premium variant with contour-tracking all-round roof wash, the extended solution of the all-round roof wash, or the cheaper side/front/rear system.

Waxing programs – look after the vehicles and the revenue will take care of itself

- Vehicle care and preservation programs are extremely popular with customers and are therefore a key to more revenue and profit.
- Six different systems are available: cold wax, hot wax and foam wax, intensive conservation, foam polish and special waxing programs.
- Osmosis rinsing helps to provide speck-free drying.

Wheel cleaning – your customers will appreciate it

- Wheel washing brushes with a large diameter give even large wheels a thorough cleaning.
- Wheel spraying systems with special cleaner loosen stubborn dirt during prewashing.
- Wheel washers with an integrated high-pressure system even clean wheels with irregular shapes and the lower sill area extremely thoroughly.

Underbody wash – increase business by adding options

- Particular appreciated during the winter and in the spring.
- A model that is sunk into the floor and a floor-mounted version are available. The latter is also easy to retrofit in existing bays. Both systems are available with segment control or swivelling tubes.
- Segment control allows short vehicles to be washed accurately and is therefore economical.

Perfect dimensions – maximum business

- The optimum dimensions of 3.05 m, 3.20 m, 3.40 m and 3.60 m are suitable for many different bays.
- More business potential can therefore be exploited by utilising the existing bay height.
- Ideal washing heights of 2.25 m, 2.40 m, 2.60 m, 2.80 m – always suitable for the latest vehicle dimensions.

Machine design – individual design for effective advertising.

- Attractive design with four variants: Classic, Star, Multi, Display
- Top quality 2-colour powder coating with many different colour options

Operating terminals – many variants with convenient use and added benefits

- **Code light:** the best solution for a convenient input device: Wall-mounted terminal.

- **Code:** Attractive terminal for wall or floor mounting. Code output device for cash office, code entry via keyboard, operating mode with or without cable connection, registration of all washing programs.

- **Card:** Versatile washing card reader with transponder technology for contact-free, wear-free reading, single wash / multiple wash / value card function, Happy Hour function.

- **Card + Code:** Combined solution for all cases – single wash via code with registration, multiple wash cards and value cards with robust transponder cards with no time limit.

The “World of WashTec” has everything for your success.

- **Comprehensive range:** The right solution for your washing business can always be found.
 - **Roll-over car washes** for low, medium and high washing volumes
 - **Conveyor tunnel systems** with modular design for all sizes and all requirements
 - **Commercial vehicle washes** for washing companies and in-house requirements
 - **Self-service washing equipment** with modular design for all needs and different location sizes
 - **Water treatment** – chemical-free and environmentally friendly
- **Rapid service** 250 engineers in the field throughout Germany – **always in your neighbourhood.**
- **Customized financing plans:** We will promote your business at attractive conditions.
- **Reliable experience:** Innovative car washing technology for more than 40 years. **More than 2 million cars are cleaned in WashTec washing facilities every day.**
- **Value for money services:**
 - **Site analysis** for optimum sizing of your business
 - **Cost-effectiveness calculations** help with your planning
 - **Sales training for staff** increases revenue
- **Tested quality** EN ISO 9001, 14001 certification – for your safety.
